

CROP INSURANCE

WORKSHOP

**NOV. 1,
2017**

**LUNCH WILL
BE PROVIDED.**

Many decisions in agriculture involve risk and uncertainty. Two main risks that growers face are yield loss and price decline.

Federal crop insurance can mitigate both as part of an effective farm safety net. There are different types of insurance a grower can purchase. This workshop will explain the different options that are currently available, their requirements, and coverage.

LOCATION

UF/IFAS Citrus Research and Education Center
700 Experiment Station Road
Lake Alfred, Florida 33850

TOPICS WILL INCLUDE

- Reference dollar amount policy for citrus fruit & trees
- Whole Farm Revenue for citrus, blueberries & peaches
- APH coverage for blueberries
- Written agreements

REGISTRATION

<https://cropinsurance.eventbrite.com>

Registration by October 25th - \$25.00

Registration after October 25th - \$35.00

Registration will begin at 8:30 and the program at 9:00 a.m.
