1. **Authorship**
   Would the article benefit from expanded authorship or acknowledgement of appropriate expert?

2. **Title**
   Is the title descriptive of the material presented?

3. **Purpose**
   Are the purpose and/or objectives stated clearly?

4. **Readability**
   Is the information presented at an appropriate readability level for its intended audience? (Does the document present an appropriate level of technical information and complexity for the intended audience?)

5. **Organization**
   Does the article flow in a logical, concise, and well organized fashion?

6. **Illustration**
   a. Do the tables, figures, or graphics effectively support and convey article information?
   b. Is the use of tables, figures, or other graphics adequate?

7. **Discussion and Content**
   a. Is the discussion relevant to the information presented?
   b. Would the article benefit from either more or less comprehensive distillation of relevant information?

8. **Conclusions**
   Do the author(s) effectively summarize the contents and important conclusions within the work or information reported?

9. **Originality**
   a. Does the publication duplicate publications currently available?
   b. Is the content substantially different from others available?
   c. Is this publication intended to replace an existing publication?

10. **Factual Accuracy**
    Are there errors of fact, interpretation, or calculation?
11. **Recommendations**

If article conveys recommendations or opinions, are these based on factual evidence?

If revision is recommended, make suggestions which will improve the manuscript. If major revisions are suggested, then indicate the major deficiencies.

- Can be submitted for EDIS or Trade Journal with little or no revision
- Needs significant revision
- Needs extensive revision and re-review

Rev. May 2005
